

NFSA Training - Wisconsin

Antifreeze System Discussion Panel

November 18, 2019

1:00 PM – 4:00 PM

Embassy Suites – Brookfield

1200 South Moorland Road Brookfield, WI

ANTI-FREEZE SYSTEM

The sprinkler system in this building is made up of one or more systems containing an anti-freeze solution for protection against freezing.

Type of Anti-freeze:

Manufacturer:

Tradename or Brand:

Solution Concentration: %

System Volume: gallons

Protected to: degrees (F/C)

Location:

SmartSign.com | 800-955-3333 | 5-8888

Since the NFPA TIA regarding antifreeze systems there have been questions on what is allowed and what ITM needs to be done to these systems. This discussion panel will include Mark Hopkins, NFSA Vice President Engineering; Mark Fessendan, JCI/Tyco; and Kerry Bell, UL.

The discussion will cover the NFPA standards that apply to antifreeze systems (NFPA 13, 13D, 13R and 25), the current available products, UL product testing, and ITM decision-making guide.

There is no cost for this discussion panel. WI CEU's are applied for Contractors, Fitters and Testers. Registration will be required.
